CAE in Cybersecurity Community

invites you to

SAVE THE DATE!

for the

2024 National Cybersecurity Education Colloquium

(NCEC)
Where:
Marriott St. Louis Grand
800 Washington Avenue
St. Louis, MO

When: October 7-10, 2024

Plan to join us for NCEC 2024, our fall event featuring the VIVID Competition, the annual PMO meeting, our annual Executive Leadership Forum (ELF), grants initiatives workshops, and a Research Symposium.

The VIVID Coalition is currently leading the NCAE-C virtual internships and the VIVID competition. The 100 teams currently in the competition will be narrowed to fifteen, and those teams will be competing at NCEC from Sunday through Wednesday, with the awards ceremony Wednesday at ELF.

The NCAE-C PMO is currently collaborating with the National Science Foundation to create an Artificial Intelligence (AI) in Cybersecurity Program of Study, with a pilot to be offered to designated CAE-CD and CAE-CO institutions in spring 2025. This new PoS will be launched at a special workshop Monday afternoon.

The remainder of the week is familiar to our veteran institutions. Tuesday will feature the annual PMO meeting, focusing on implementation of the new re-designation requirements. Wednesday will feature ELF and grants initiatives workshops. Thursday will be the NCAE-C Research Symposium.

Please mark your calendars and meet us in St Louis! Keep an eye out for launch of the registration site, information on hotel reservations, and featured speakers.

*This event is not associated with the Colloquium for Information Systems Security Education (CISSE)
